

# Mitel Connect ONSITE

## IP Phones Overview

# Superior Sound & Ergonomics for the Highest Quality

Mitel designs and builds our own desk and portable IP phones to ensure that our customers always have the most fully-featured communication devices.

Mitel pairs business phones with unified communications to deliver a total solution. Choose the communications device best-suited to your needs, whether that's a desk phone, smartphone or PC—you'll always have the best possible user experience.

Each Mitel Connect IP phone is preconfigured for quick and easy installation with the Mitel Connect UC system and offers all the advanced features, high performance and quality required in today's constantly connected workplace.

- Visual voicemail simplifies voicemail management for professionals, contact center agents and executives
- Enhanced form factor that incorporates the latest user feedback
- Soft keys and line/call appearances for flexible call handling and access to rich programmable features
- On-phone diagnostics for faster troubleshooting and shorter time to resolution

## Elegant Ergonomic Design

Since communications are a key aspect of business activity, a phone should feel comfortable and be easy to use. The Mitel attention to design detail delivers a precision-balanced, contoured handset which can rest comfortably against the ear, thereby maximizing productivity while minimizing user fatigue and shoulder and neck pain.

The desk phone itself has two main surfaces, which position the keypad horizontally for easy dialing while keeping the display at the optimum angle for visibility. The control surface on all Mitel Connect phones makes it easy for users to manage communication tasks, including call transfer, conferencing and call parking.

## Intuitively Streamlines & Improves Communications

All Mitel Connect phones have an easy-to-read display so users can see who is calling, check for missed calls and messages and quickly see the call's status. This helps keep communication flowing across the organization. All desk phones also feature an integrated Ethernet switch that allows a network drop to be shared with a desktop PC.

Mitel Connect IP phones feature crystal-clear audio quality and offer seven full octaves of sound, while many phones only offer three. In addition, Mitel Connect high-fidelity, full-duplex speakerphones deliver exceptionally clear audio and enable hands-free conversation. All phones also support multiple languages.

### IP Phone Benefits

- Quick and intuitive access to the feature-rich Mitel Connect ONSITE communication capabilities
- Ergonomic design optimized for comfort, sound and usability
- Plug-and-play simplicity lowers management resource needs

## Ease of Use Streamlines Communications Management

All Mitel Connect phones interoperate with Mitel system software, so settings, call handling rules, presence information, automatic directory updates and other features can be managed according to users' preferences. For instance, users can extend the power of their phone far beyond their desks by assigning their extension to any phone, including a mobile phone or home phone.

## Cordless

In addition to desk phone options, Mitel offers a DECT-based cordless phone for users whose job role requires them to move around the workplace.

## Designed for the Distributed Enterprise

Select Mitel Connect phones can easily be deployed remotely utilizing the built-in VPN client providing the full Mitel experience in the remote or home office.

## Enhanced Productivity

Select models support XML applications that allow developers to integrate the phones even tighter into their business processes to boost the productivity of their users.

## Mitel Connect IP Phones for Every User

### Executive & Conferencing

- **IP655:** A twelve-line telephone ideal for executives and executive assistants. In addition to setting a new bar in speakerphone performance by leveraging advanced microphone array technology, interaction with the telephone is extremely intuitive via the large color touch display. Visual voicemail makes it very easy to browse, play and manage voicemail messages and the advanced directory display with telephony presence allows users to see if somebody is available for a phone call. Users can personalize the background image on the phone and also easily manage programmable buttons. An integrated headset jack, plus Gigabit Ethernet switch as well as a built-in VPN client also come standard with this phone.

This telephone with its advanced beam forming microphone array technology is ideally suited for small to medium conference rooms and in larger rooms when deployed with optional extension microphones. Users can access the full telephony feature set as well as directory information in the conference room.

### Professional

- **IP485g:** An eight-line phone with a crisp 480 x 272 pixels backlit color display offers an expanded directory with unlimited alphanumeric lookup with sort by first or last names. These features and the built-in visual voicemail application make this phone ideal for the advanced professional.

Also included are six feature keys, five soft keys, a full-duplex speakerphone, integrated headset jack and a Gigabit Ethernet switch for the connection of a PC. The optional BB424 button box expands the phone's capabilities for attendants.

- **IP480g:** An eight-line phone with an easy-to-read, back-lit display. Expanded call history and directory along with visual voicemail are provided, making the IP480g an ideal phone for busy professionals. Six feature keys and five soft keys provide easy access to ShoreTel features. A full-duplex speakerphone, integrated headset jack and 10/100/1000 Ethernet switch are standard.
- **IP480:** Provides the same features as the IP480g phone, but with an integrated 10/100 Ethernet switch for more economical deployments.

## Common Areas

- **IP420g:** A two-line phone ideal for break rooms, lobbies and contact center environments. The IP420g phone features an easy-to-read, high-contrast display and six feature keys including transfer, conference, hold, redial/history and voicemail. Unlimited system / alphanumeric lookup and storage are provided. An integrated 10/100/1000 Ethernet switch is standard.
- **IP420:** Provides the same features as the IP420g phone, but with an integrated 10/100 Ethernet switch for more economical deployments.

## Cordless Phones

- **IP930D:** Fully integrated, desk phone capabilities in a cordless version. Using DECT technology, these handsets and corresponding base and repeater units enable receptionists, retail store staff, facilities managers and other employees to remain connected while roaming freely through their workplace.

## Programmable Button Box

- **BB424:** The BB424, an accessory for the IP485g, is an excellent tool for operators, receptionists, assistants and supervisors. The BB424 provides visibility over other users as well as single-button access to advanced telephony features including transfer, silent monitor and barge in.

The BB424 is a USB accessory for the IP485g IP phone and features 24 programmable buttons. Users can also employ the four page buttons across the bottom to program up to 96 buttons total. If the user prefers seeing all of the buttons at once, up to four physical units can be used instead (requires additional local power supply).
